Turning Care Around

Turning Care Around

HAAN is part of a new generation of brands that want to build a better future for the planet and humanity.

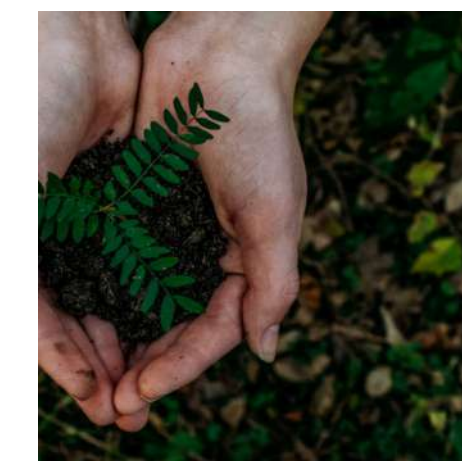

HAAN transforms personal care products through clean formulas with a disruptive approach. Sustainability and effectiveness meet style with the aim to celebrate the pleasure of taking care.

Clean Ingredients

All of our products feature **clean, safe and responsible ingredients**. When a formula is clean, it means it doesn't use any chemical or synthetic ingredients in favor of natural active ingredients in our formulas. Like this, we exclude many ingredients from our formulas that are likely to pose a risk to human health or to the environment.

A clean cosmetic also does not test on animals nor include any animal ingredient on it, which means we're also **vegan**.

Clean Ingredients

Vegan

Design meets sustainability

SAVE UP TO 89% OF PLASTIC

We like to care about people, but also about our planet. That's why we aim to **reduce the use of plastic in your personal care routines** through Refills. HAAN products are designed to enjoy, refill, reuse and recycle, so that you won't want to throw them away and reuse them over and over.

Refilling is a new approach to create a lasting change for the planet. We can proudly say we are the first brand to get all product categories refillable, **saving like this up to 89% of plastic** and also money for the consumer.

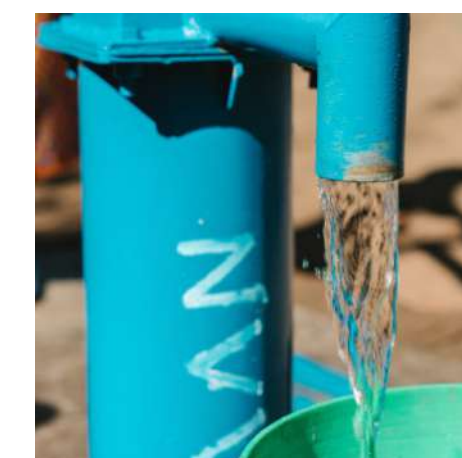

Ready to Refill

Social Purpose

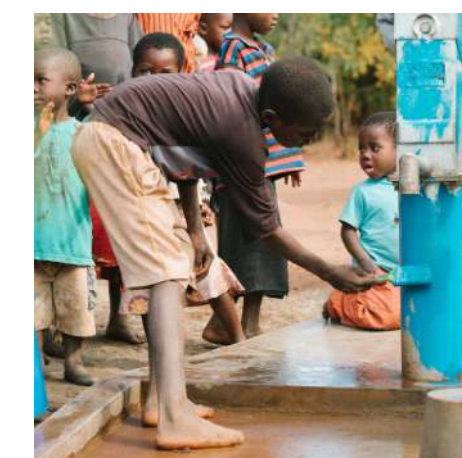

We do not just focus on our products' design and sustainability, but also on our social commitment, which is a key part of the brand. Our aim is to give back and do good for the people and the planet, and we can achieve this by focusing our mission on Water Crisis awareness and eradication.

20% of our benefits are intended to build underground water wells in developing countries. Access to clean water improves health conditions, increases school enrollment, and fosters economic prosperity for communities in need. As each HAAN product contributes to providing clean water in developing countries, we like to think we are uniting people one way or another.

So far, **we've built 17 wells in Malawi, and 5 more are coming.**

11M liters generated

17 wells created

3.726 benefited people

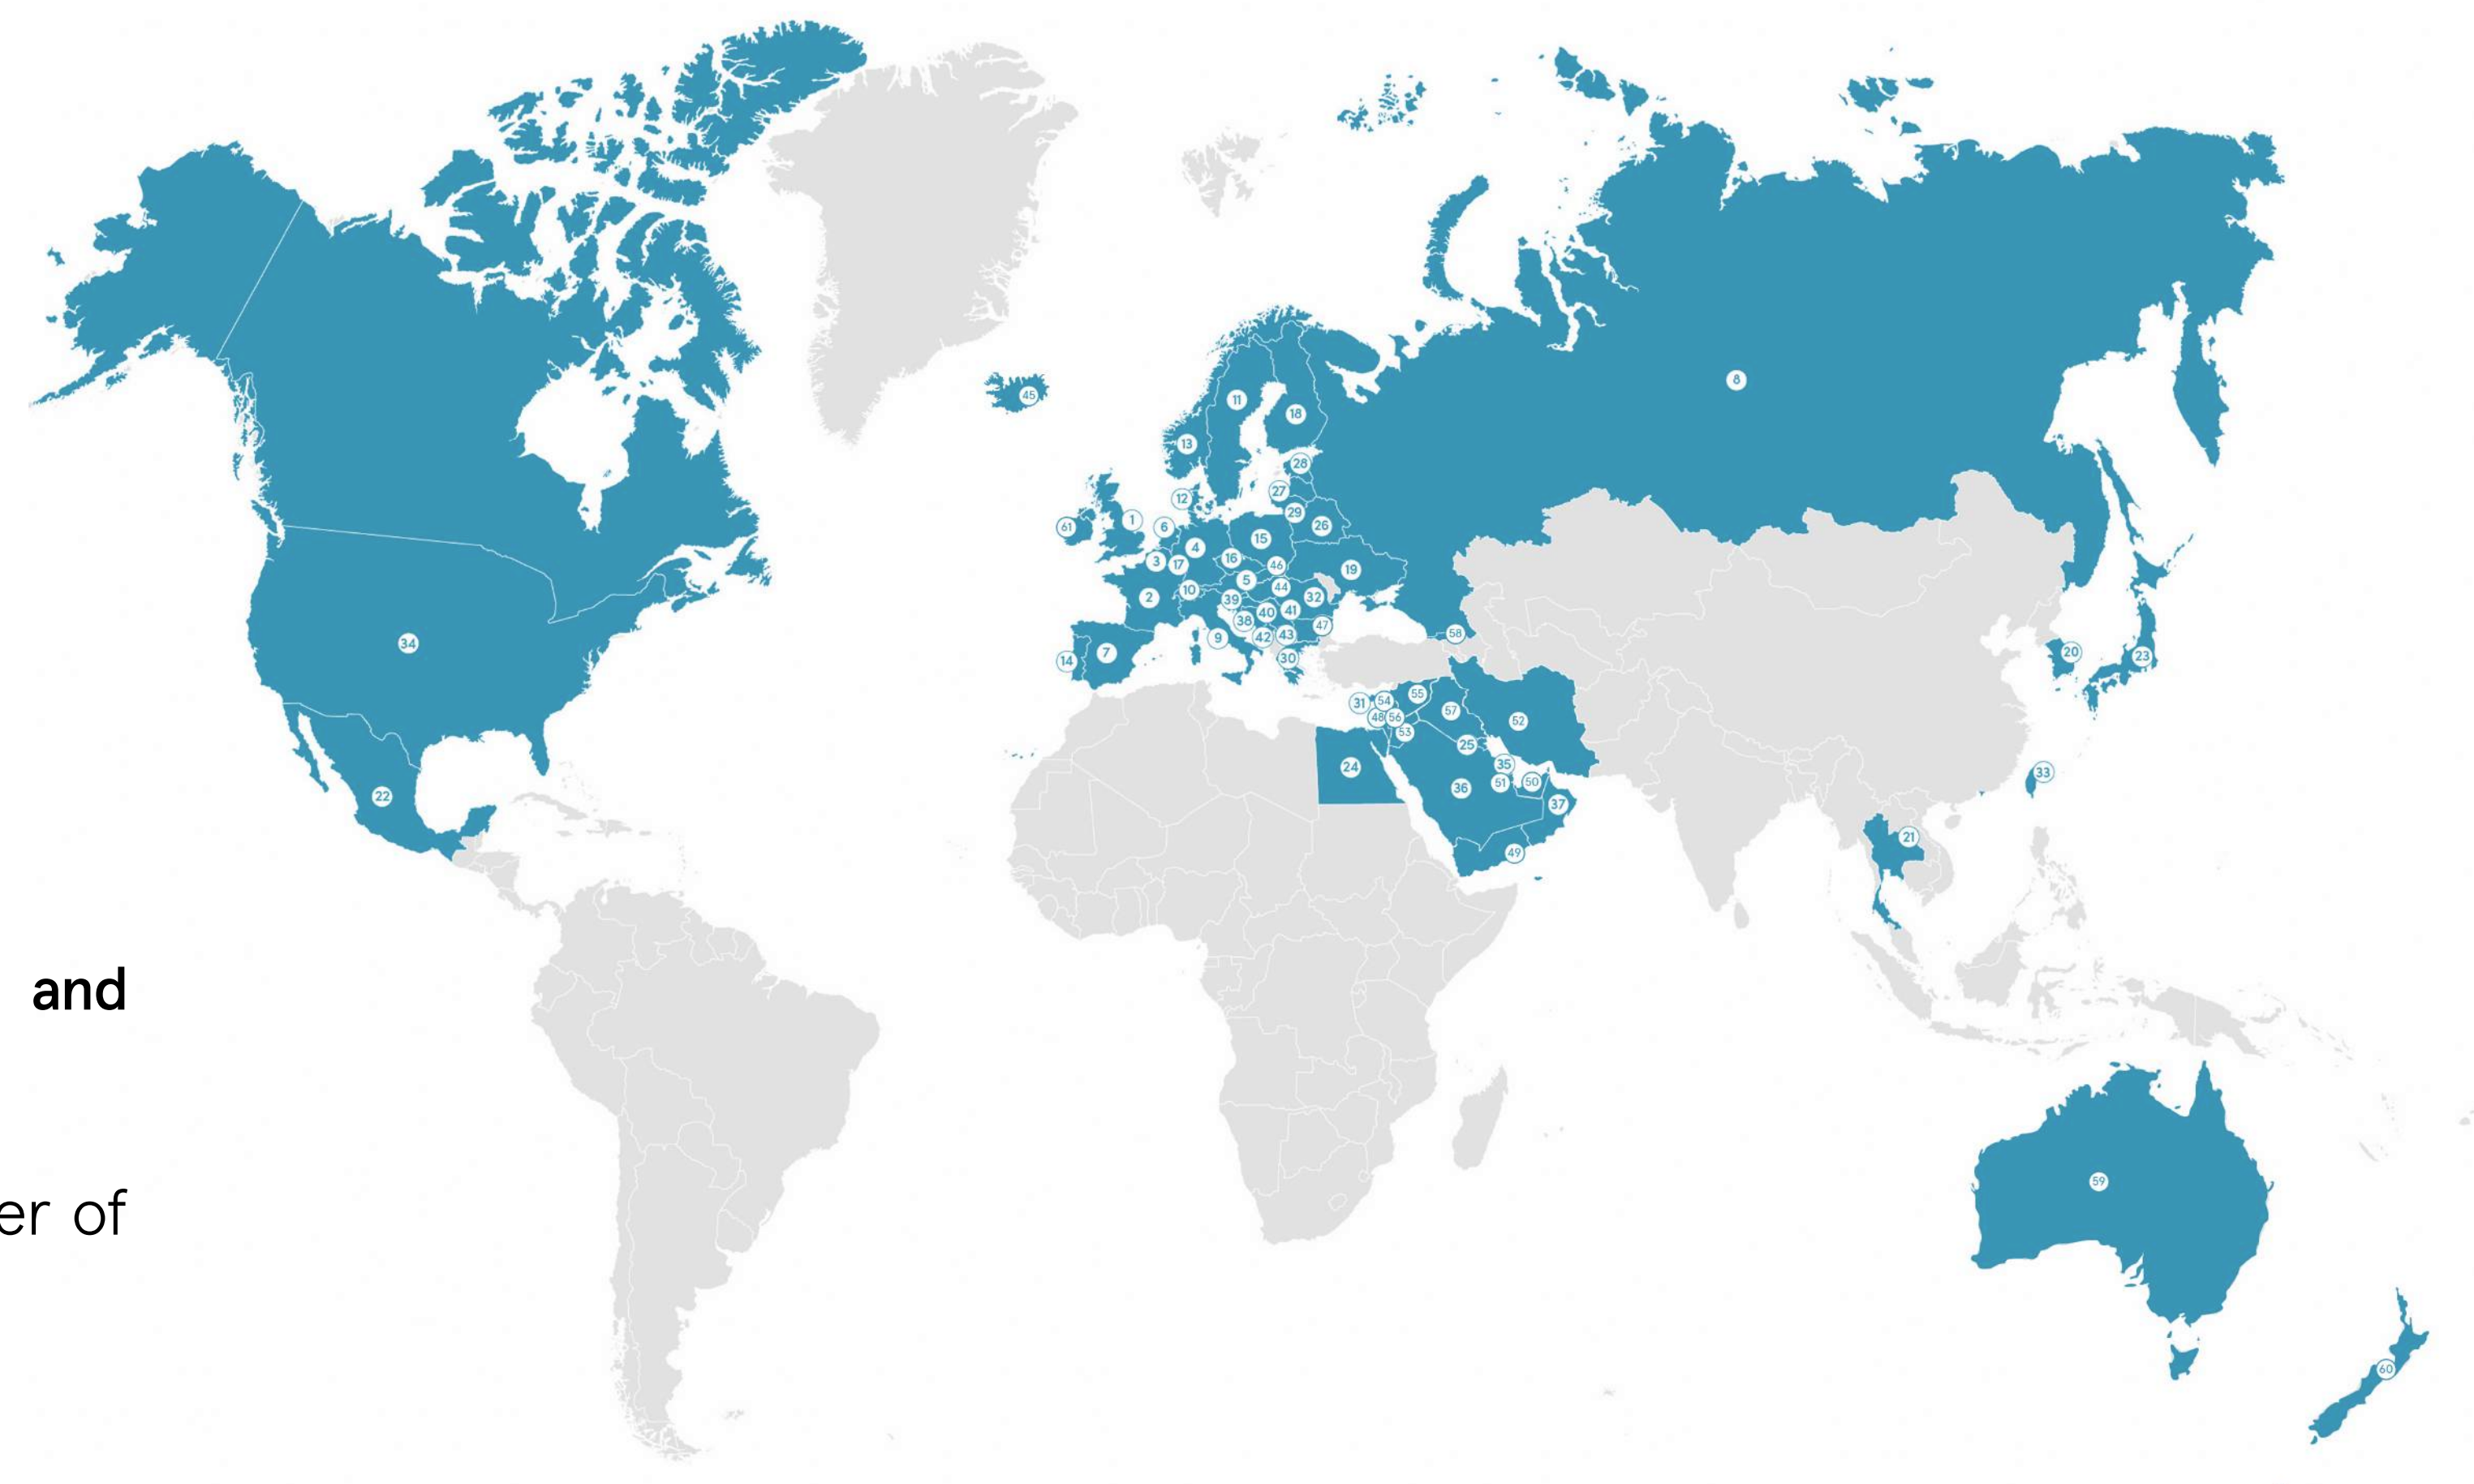

Present in more than 50 Countries

BORN IN BARCELONA.
MEANT TO BE INTERNATIONAL.

PRESENT IN MORE THAN 50 COUNTRIES.
MORE THAN 7.000 POINTS OF SALE.

HAAN products can be found in **concept and department stores, beauty chains and pharmacies.**

The brand is also **present** in a significant number of **Duty Free airport shops.**

Reinventing the travel industry

We saw that in a traditional market such as the travel and hotel world, there was a gap, a niche market for boutique, eco and sustainable hotels, of more than 4*. Today's customer demands more commitment to sustainability, so hotels have to change their practices. At HAAN, we have the perfect product for this hotel target: an attractive design, a sensorial experience through fragrances and colors, and sustainability.

Clean Ingredients

Recyclable

Ready to Refill

Moreover, there is no progress without thinking of the rest of humanity. That's why HAAN's raison d'être is "We like to care about people, but also about our planet".

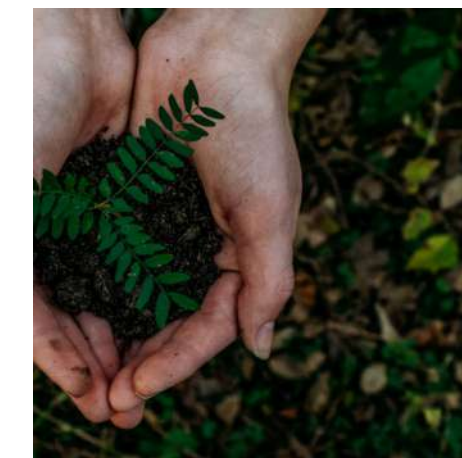

From home until destination

We want to be part of our consumers' journey; from home, through the way and until the destination.

Travel is an experience that should make you feel at home, and HAAN products will be the best ally to achieve this.

Routines will become less routine and turn guests' stay into a complete sensorial experience. Our dispensers and niceties will give a twist to the usual personal care and make everyone who tries them look forward to taking time to pamper themselves.

The partners we collaborate with share HAAN's core values:

Sustainability
